# BigTrees 1.6.4
Forge Version

A Minecraft mod by Karob
For Minecraft 1.6.4
Instructions Document

Site: http://www.minecraftforum.net/index.php?showtopic=782646

Features

- Big trees added to different biomes:
- Most biomes have Great Oak, Thick Pine, Block Oak, and Post Oak.
- Desert has big dead trees. It may not make sense, but it looks cool. :)
- Swamp biome has Great Swamp Oak, Cyprus, and Hat Trees.
- Taiga biome has Thick Pine in some regions.
- Roots from some trees grow through ground, sometimes into caves.
- All trees can be grown via custom saplings.
- Config file 'kbigtrees.txt' allows for changing many things
- New look, same great taste!

Installation

Preliminary

Backup your Minecraft saves in case something goes wrong. This is always a good idea anyway.

Installation

1. Install Forge.
2. Copy "BigTrees-###-forge.zip" to the "mods" folder.
3. Done!

Configuration

When you run BigTrees for the first time it will automatically generate the configuration file "kbigtrees.txt" in the "config/bigtrees" folder, containing all the default settings. You may then modify that file to customize your BigTrees experience. For your convenience, a file called "kbigtrees-null.txt" is included in BigTrees-###-forge.zip. That file provides the configuration options to completely disable big trees from generating along with chunk generation, so they can only be manually grown from saplings.
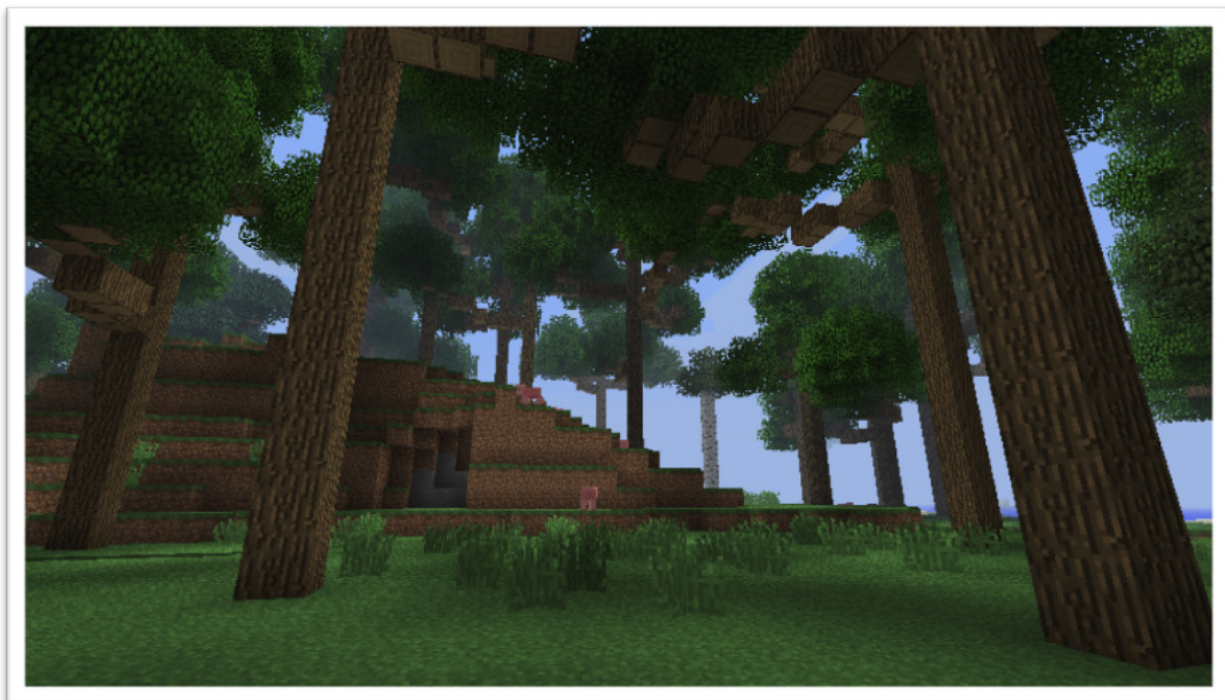

Tree Growth Guide

To grow BigTrees, custom BigTrees saplings must be planted in certain patterns. See the following page for a pictoral guide to crafting BigTrees saplings, and for tree growth patterns. To fill space, here are some tables. ☺

Sapling	Recipe Ingredients	
Big Oak	1x Oak Sapling	2x Oak Log
Big Birch	1x Birch Sapling	2x Birch Log
Big Pine	1x Spruce Sapling	2x Spruce Log
Hat Tree	3x Oak Sapling	1x Oak Log
Cyprus	1x Spruce Sapling	3x Spruce Log
Dead Tree	3x Stick	2x Oak Log

Tree	Sapling Pattern

Cool Compatible Mods

I have mostly worked to make BigTrees-Forge compatible with **Better World Generation 4**. If you find BigTrees-Forge to work well with other mods, feel free to tell me about it and I might include that mod on this list!
